

ABELEJE OLANIYI GEORGE

BACKEND/SOFTWARE ENGINEER

[Github](#) | olaniyigeorge77@gmail.com | [LinkedIn](#)

PROFILE

Backend-focused Software Engineer with 6+ years of experience designing, building, and scaling production-grade systems. Strong background in Python (FastAPI, Django), distributed APIs, data-driven services, and cloud infrastructure on AWS. Experienced in building intelligence-driven platforms, integrating AI pipelines, and optimizing backend performance under real-world load. Comfortable translating complex product requirements into reliable, scalable backend architectures.

CORE TECHNICAL SKILLS

Languages: Python, Typescript, Javascript, SQL

Backend: Django, FastAPI, Node Js, Next Js

Databases: PostgreSQL, MongoDB, SQLite, Query Optimization, Schema design

Cloud & DevOps: AWS (EC2, S3, RDS, SES, CloudFront), Docker, CI/CD pipelines, containerized deployments, Render, Vercel

Engineering Practices: System design, performance optimization, unit & load testing, API documentation, Git-based workflows, code reviews

PROFESSIONAL EXPERIENCE

Winnov8 - Software Engineer - 2025

- Owned backend and frontend delivery of production features, building **scalable APIs and services** using Node.js and Python-based backends.
- Designed and implemented an **intelligent recommendation system**, collaborating with stakeholders to translate product requirements into reliable, testable services.
- Optimized a real-time notification and messaging system, **increasing system performance by ~58% under live usage**.
- Contributed to CI/CD pipeline design and automation on AWS, improving deployment reliability and reducing release friction across environments.
- Actively participated in architecture discussions, code reviews, and performance tuning for growing production workloads.

Revela Africa – Backend Engineer – 2025

- Designed and developed a **scalable Python-based backend** using FastAPI, supporting core features such as **event creation, ticketing, RSVPs, authentication, and payment workflows**.
- Integrated **third-party services and APIs**, including **Google APIs and payment gateways**, enabling automated user onboarding, calendar synchronization, and secure checkout experiences across devices.
- Optimized backend service orchestration and introduced **advanced caching strategies** to improve system performance during peak event traffic, significantly reducing response times and stabilizing high-concurrency operations.
- Collaborated closely with frontend engineers to define API contracts, improve data consistency, and deliver reliable end-to-end user experiences.

The ECO Platform – Backend Engineer

- Refactored legacy Django backend services, removing dead code and eliminating inefficient execution paths.
- **Reduced API latency by over 94%**, significantly increasing throughput and enabling support for **thousands of concurrent users**.
- Improved backend scalability and service boundaries for frontend integrations, resulting in a more stable production environment.

WispTalkAfrica – Software Engineer – 2023 – 2024

- Led the migration of backend infrastructure to **AWS**, leveraging **EC2, S3, RDS, and CloudFront** to improve system availability, scalability, and resilience.
- Strengthened system reliability through improved infrastructure configuration, monitoring practices, and incremental performance optimizations.
- Contributed to deployment and infrastructure workflows supporting scalable Python-based applications.

PROJECTS & INNOVATION

CoopWise – Backend Engineer

- Built an **AI-powered cooperative savings and finance platform** using FastAPI (backend) and Next.js (frontend).

- Designed scalable APIs for authentication, payments, and cooperative workflows.
- Integrated AI agents and Retrieval-Augmented Generation (RAG) pipelines to deliver personalized insights and intelligent user experiences.
- Focused on backend architecture, data flow, and system reliability.

HACKATHONS & RECOGNITION

Hackathon Winner(Coopwise) – July 2025

- Led backend architecture and system design for Coopwise, a production-ready solution recognized for architectural quality, scalability, and real-world applicability.
- Awarded for clean backend design, performance considerations, and practical deployment readiness.

EDUCATION

Bachelor of Science (B.Sc.) –Computer Science

National Open University of Nigeria, Lagos State

Professional Development –Backend Development

ALX Africa (*Mar 2025 – Oct 2025*)
